## राष्ट्रीय प्रतिरक्षाविज्ञान संस्थान

NII Seminar Series

## It's the small things that count

*The Sengupta lab at Harvard applies tools from nanoscience to better understand the interactions between cancer cells and stroma. This talk will highlight recent insights into novel mechanisms that cancer cells deploy to beat the immune system and discoveries in cancer treatment beyond the classical immune checkpoint inhibitors.*

11:00 AM | Friday | 15 December 2023

Seminar Room I, National Institute of Immunology

**Shiladitya Sengupta, PhD**

Associate Professor, Medicine  
Brigham and Women's Hospital  
and Harvard Medical School
